Mustapha Sakka

Software & IA Engineer
Lyon, Auvergne-Rhône-Alpes, France

Résumé

Hi, welcome to my profile! Tech Lead & Backend Architect with 13 years of experience designing, developing and evolving web applications and complex software systems.I combine hands-on engineering with technical leadership, software architecture, mentoring and a strong focus on delivering business value. BACKEND & SOFTWARE ARCHITECTUREMy core expertise is PHP, Symfony and API Platform. I also work with Node.js, TypeScript, Python, Go, Vue.js and Angular.I’m passionate about Clean Architecture, Hexagonal Architecture, DDD, TDD, SOLID, Design Patterns, Clean Code and refactoring. AI AGENTS & AUTOMATIONI’m expanding my expertise into AI agent development with Python, using tools and frameworks such as LangChain and the OpenAI SDK. I also explore n8n for workflow automation and Jupyter Notebook for rapid prototyping and experimentation.My goal is to build practical AI solutions that address real business needs and integrate effectively into existing systems.☁️# CLOUD & DEVOPSStrong experience with AWS, Docker, Kubernetes, Terraform, Ansible, CI/CD, PostgreSQL, Redis and Kafka.I also leverage AI-assisted development tools such as Claude Code to improve coding, testing, refactoring and engineering workflows. WHAT I’M LOOKING FOROpen to Tech Lead, Backend Architect, Senior Backend and IA Engineer opportunities.I’m particularly interested in freelance and long-term consulting opportunities, ideally remote or hybrid, where I can combine engineering, architecture and innovation. I enjoy solving complex problems, sharing knowledge and helping teams build reliable, maintainable and scalable solutions. Feel free to reach out to discuss a project or potential collaboration.#TechLead #BackendArchitect #PHP #Symfony #Python #AIAgents #LangChain #OpenAI #n8n #SoftwareArchitecture #AWS #DDD #TDD #CleanArchitecture #AI #ClaudeCode

Expérience

Syndicat Départemental d'Energies du Rhône (SYDER)

Team Lead PHP | Node.js | Angular

juin 2026 - Present (5 mois)

Lyon, Auvergne-Rhône-Alpes, France

Managment and oversight of Syder's entire application portfolio, ranging from adaptive and corrective maintenance to major structural enhancements

Environment: PHP, Typescript, Node.js, Angular, Vue.js, SQL Server, PostgreSQL, Claude code

AGENCE POUR L'INFORMATIQUE FINANCIERE DE L'ETAT

Team Lead PHP & Vue.js

juin 2024 - mai 2026 (2 ans)

Lyon, Auvergne-Rhône-Alpes, France

- Active participation in crisis meetings to analyze, diagnose, and resolve critical technical issues.
- Technical leadership and mentoring of the technical team.
- Design and implementation of the technical environment and architecture.
- Accountable for delivery quality and adherence to deadlines.
- Conducted reverse engineering of legacy systems and designed target architectures.
- Link to platform: https://www.marches-publics.gouv.fr

Groupe NCA

Team Lead

janvier 2023 - mai 2024 (1 an 5 mois)

Lyon, Auvergne-Rhône-Alpes, France

- Participated in the recruitment and technical assessment of developers
- Led and supported a team of 4 developers, providing both technical and individual guidance
- Established and structured development practices: code reviews, quality standards, pair programming, and mob programming
- Gathered and analyzed requirements, designed and validated technical solutions
- Facilitated Agile ceremonies and supported the team in continuous improvement
- Led the refactoring and evolution of the existing application, including the implementation of new features

PHP, Symfony, API Platform, Slim, Zend, FTP, postegreSQL, docker, gearman, supervisor, mailjet, phpUnit, phpStan, Ansible, Jira

Bedrock Streaming

Back End Developer

juin 2022 - décembre 2022 (7 mois)

Lyon, Auvergne-Rhône-Alpes, France

- Handle the BFF(Back For Front) API Gateway
- Code review
- Monitoring
- Resilience-driven development
- Cloud-oriented development (AWS, lambda function, SQS, S3)
- Technical workshops, mob programming
- Technical documentation

Cfdp Assurances

2 ans 10 mois

Full Stack Engineer (product pricing PHP Symfony Vue JS Application)

août 2021 - juin 2022 (11 mois)

Lyon, Auvergne-Rhône-Alpes, France

Tool allowing dynamic creation of a standard or tailor-made product by combining components: formulas, options, guarantees, benefits and / or services.

PHP7.4, Symfony4.4, Open API, Docker, GitLab, PhpStorm
Vue JS 2, Storybook, Cypress, Jest, WebStorm
Kubernetes, Ansible, AWX, Gitlab CI, Nexus, Sonarqube, Liquibase

FullStack Developer (Supervision EDI PHP Symfony application)

avril 2020 - juin 2022 (2 ans 3 mois)

Lyon, Auvergne-Rhône-Alpes, France

Conception and development of an internal application for monitoring incoming flows, in connection with TALEND jobs.

FullStack Developer (Espace Partenaire PHP Symfony application)

novembre 2019 - juin 2022 (2 ans 8 mois)

Lyon, Auvergne-Rhône-Alpes, France

The "Espace Partenaire" application allow CFDP insurance intermediaries to access various interconnected services (claims monitoring, documentary space, etc.).

This Web portal offers various functionalities for the most part interfaced with the various business applications existing in the company.

- Supervision and management of the internalization of the application at CFDP
- Conception and development of new modules
- Ensure corrective maintenance of the application
- User support
- Link to FO: https://espacepartenaire.cfdp.fr/

Tools: PHP7.4, Symfony3.4, Talend, SQL Server, Git, Postman, PHP Unit, Bootstrap, Gulp, Nexus, Docker, PHP Stan, PHP CodeSniffer, InVision, Sendgrid

FullStack Developer (Entrée Sortie PHP Symfony application)
septembre 2019 - mars 2020 (7 mois)
Lyon et périphérie

Development of an application for managing the entry and exit of employees within the company

Tools: PHP7.4, Symfony4.4, Apache, MySQL

AUSY
3 ans 4 mois

Development Team Lead Symfony/Angular
janvier 2019 - septembre 2019 (9 mois)
Lyon et périphérie

Design and Development of a POC application for AUSY.

- Development and documentation of the API back-end with Symfony REST API (FosRestBundle, NelmioApiDocBundle ...)
- Creation of front-end components with Angular

- Tools: php7.2, Symfony3.2, Angular6, MySql5.7, Apache
- Environment: Windows10, Debian, Git, PhpStorm, Jira, Cmder, Postman

Web Software Engineer at Orange (php Zend)
février 2017 - janvier 2019 (2 ans)
Lyon et périphérie

Development, maintenance and test of web application 'Achil' dedicated to buying shared FTTH infrastructure.

- Environment: phpStorm, multiPutty, sqlYog, wamp server, jmeter, gitlab, jenkins, filleZilla, mingle, cactus, mantis, soapUI

Web Backend & Frontend Engineer (php Drupal 8)
juin 2016 - février 2017 (9 mois)
Lyon et périphérie

Client: European Broadcast Union
Project: Music exchange platform
URL for website: www.eurovision.net

The creation of web application with Drupal 8.

* Create views through Drupal interface.
* Install and personlize modules.
* Implement new modules.
* Graphical integration of the solution.
* Correction of anomalies.

- Environment : Windows8, Debian8, Git, Sublime Text, Php Storm, Apache, MySQL, Vagrant, Photoshop
- Tools: PHP7, Durpal8, HTML5, JQuery, Twig, Bootstrap, MySQL, Git, Jira, Code sniffer, Sass, Grunt

868SolutionsExpo
Technical web referent
septembre 2018 - mai 2019 (9 mois)

CNRS
Web Agile Project Responsible (php Symfony 2.7)
juin 2015 - mai 2016 (1 an)
Lyon et périphérie

Totally autonomous, I manage agile web project where I take care of the recast and the urbanization of a client website. For this, I have ensured:

* Project management with agile method
* Study of the existing solution
* Proposal of improvement plans
* Design a new solution that meets the customer's requirements

* Implementation from scratch and test the new solution
* Assuring frontend and backend solution
* Deploying the application on pbil.ibcp.fr

Tools: PHP5, Symfony 2.7, HTML5, JS, AJAX, JQuery, Twig, Doctrine, Twitter Bootstrap, Postgres SQL, Git

Telnet
Research and Development Engineer
août 2014 - mai 2015 (10 mois)

* Analysis of customer needs.
* Development of new modules and features.
* Corrective and evolutionary maintenance of the application.
* Writing and evaluation of test plans.
* Identification of areas for improvement.

Disp
Graduation internship project
février 2014 - juillet 2014 (6 mois)
Lyon et périphérie

This graduation internship was part of the European project FI-PPP Fitman. The object was to propose a web-service based infrastructure that interacts with a character recognition server to automate the processing of the input data stream to a client company.

* Propose interaction models with the recognition server.
* Choose the most suitable model.
* Implementation of web services for parsing and validating data.
* Modeling and Orchestration of web services with BPEL.
* Implementation of graphic interfaces to translate application logic module.
* Integration of the module in the main application.

* Conception : UML, BPMN
* Tools : JAVA/ JEE, DOM, BPEL
* Environnement: OCR Server, WSO2 Server, Eclipse

IWAY
Enterprise immersion internship
juin 2013 - août 2013 (3 mois)
Sfax, Tunisie

This immersion internship aims to design and implement an application to propose hierarchical task distribution within a company. This application dynamically manages the authentication and authorization between employees.

Tools: Java, JSF, Primefaces, Spring, Spring Security, Maven, MySQL, UML

Formation

ENSI - Ecole Nationale des Sciences de l'Informatique

Engineer's degree, Software Engineering and Information Systems · (2011 - 2014)

IPEIS - Institut Préparatoire aux Études d'Ingénieur de Sfax

Mathematics and Physics · (2009 - 2011)
